FANTEC SQ-X2RU3e

Secure your data on the FANTEC SQ-X2RU3e with room for two SATA hard drives in one housing. With various RAID Level (0, 1, JBOD, and BIG) the SQ-X2RU3e provides various settings for data security and data redundancy. All drives can be displayed separately and hence controlled separately, easily switched, replaced and independently from manufacturer or capacity expanded. Due to the simple and quick installation with Plug & Play, and both data interfaces SUPER SPEED USB 3.2 Gen 1 & eSATA, the housing is set up in no time. The flexible data interfaces SUPER SPEED USB 3.2 Gen 1 and eSATA allow for lightning fast data transfer with speeds of up to 5Gbit/s (USB 3.2 Gen 1) or 3Gbit/s (eSATA0). The built-in 80mm ventilator can be controlled by hand and step less, and therewith set optimally for the built-in hard drives. The energy savings feature disables the FANTEC SQ-X2RU3e automatically when the PC is shut down.
